Mesopotamia 101

By Vickie Chao

In recent years, Iraq often dominates the headlines of our evening news. Sure, its abundant natural resource -- namely, oil -- is what makes this Southwest Asian country so influential in the world of politics. But aside from that fact, Iraq is also home to one of the oldest civilizations on Earth!

Nearly nine thousand years ago, or around 7000 B.C., people began to settle in a region sandwiched between the Tigris and the Euphrates rivers. Later on, when the Greeks visited that area, they called it "Mesopotamia," which literally meant "the land between the rivers" in their language. Strictly speaking, the coined phrase of Mesopotamia covers a broad plain of dry but rich soil lying beyond today's Iraq. It actually includes a portion of modern-day Turkey and Syria, too. Nonetheless, because Iraq represents the bulk of the region, its name and Mesopotamia are nearly synonymous.

By all accounts, Mesopotamia (or to a larger extent, a part of the so-called Fertile Crescent that extended all the way to the Mediterranean Sea) is a perfect place for settlement. With the Tigris lying in the east and the Euphrates in the west, both mighty streams carry sediment from the mountains of Anatolia (present-day Turkey) in the north. Along their respective downstream courses to the Persian Gulf, they deposit this rich soil on both sides of the floodplain, making the entire area ideal for growing vegetation. When the first settlers moved into Mesopotamia all those years ago, they made good use of this fertile land by planting all sorts of crops there. To irrigate their fields, they dug canals to divert water from the rivers. Over time, they had such a huge success, especially around a region called Sumer, that their civilization (dubbed as the Sumerian civilization) became one of the first and most advanced in the world.

The Sumerian civilization began to take shape some time around 3500 B.C. Its written language is long thought to be the oldest that ever existed. But after flourishing for more than a millennium, the Sumerian civilization collapsed and was ultimately replaced by two other great ones -- Babylonia in the south and Assyria in the north. For the next 1,500 years or so, the Babylonians and the Assyrians often lock horns as both vied for control of the entire Mesopotamia. In the end, the Babylonians emerged as the victors. After the last great Assyrian ruler Ashurbanipal died in 627 B.C., the Neo-Assyrian Empire began to disintegrate rapidly. Eighteen years later, in 609 B.C., the Babylonians defeated the Assyrians. From that point on, the Neo-Assyrian Empire ceased to exist. As joyful as the Babylonians must have been, they had no idea that their glorious days were going to end soon, too. During that short span of seventy years, they -- led by the famous Babylonian King Nebuchadnezzar II (also spelled as Nebuchadrezzar, reigned from 605 B.C. to around 562 B.C.) -conquered Judah, subdued Jerusalem, and built the Hanging Gardens of Babylon, one of the Seven Wonders of the Ancient World. After Nebuchadnezzar II passed away, the Neo-Babylonian Empire started to show signs of weakness. About two decades later, it surrendered peacefully to the Persian King, Cyrus II or Cyrus the Great. That fateful year -- 539 B.C., to be exact -- was the curtain call for the Neo-Babylonian Empire. With the Persians taking over now, a new chapter began in Mesopotamia. Though the Sumerian, Assyrian, and the Babylonian civilizations were gone forever, the trio left a deep imprint in our history. Since they were all spun from the same land, Mesopotamia thus became known as the cradle of civilization!

Mesopotamia 101

Questions

- 1. Which of the following about Mesopotamia is true?
 - A. The oldest written language was found in Mesopotamia.
 - B. Mesopotamia means "the land between the rivers" in Latin.
 - C. The Persians established the first civilization in Mesopotamia.
 - D. The Babylonian civilization was the earliest civilization in Mesopotamia.

Name 2. Which of the following present-day countries is NOT part of	 8. Who built the Hanging Gardens of Babylon? A. Nebuchadnezzar II B. Hammurabi C. Cyrus the Great D. Assurbanipal
Mesopotamia? A. Syria B. Iran C. Turkey D. Iraq	All the ancient civilizations owed much of their existence to the rivers that flowed through their lands. Explain why that was the case.
 3. Which two rivers flow through Mesopotamia? A. The Yellow River and the Yangtze River B. The Tigris and the Euphrates C. The Nile and the Euphrates D. The Danube River and the Rhine River 	
 4. Who created the oldest written language on Earth? A. The Persians B. The Sumerians C. The Babylonians D. The Assyrians 	
 5. Which of the following events took place last? A. The Babylonians built the Hanging Gardens of Babylon. B. The Sumerian civilization collapsed. C. Cyrus II of Persia conquered the Neo-Babylonian 	
Empire. D. The Neo-Assyrian Empire collapsed. 6. Who conquered Jerusalem?	
A. Hammurabi B. Puabi C. Assurbanipal D. Nebuchadnezzar II	
7. What marks the southernmost border of Mesopotamia? A. The Caspian Sea B. The Black Sea C. The Persian Gulf D. The Red Sea
